You!*

**DIBBLE'S
DOUBLE CROSS
HYBRID
29-3 CORN**

was developed at the Cornell Agricultural Experimental Station to meet the growing conditions in New York State and similar conditions in other areas. It matures in 110 to 115 days and is recommended for ensilage wherever West Branch Sweepstakes or Leaming is now used, and for grain wherever a late strain of Cornell No. 11 matures. The seed is raised on our own farms and is certified.

DEAR PLANTER:

Several weeks ago we mailed you a copy of our 1940 Catalog, describing Dibble's Farm Seeds. We are proud of the fact that we have been furnishing farm seeds to progressive farmers for 49 years. Periodically we like to remind you of our motto, "Farm seeds and farm seeds only; one grade and that the best obtainable at the lowest price consistent with the highest possible quality."

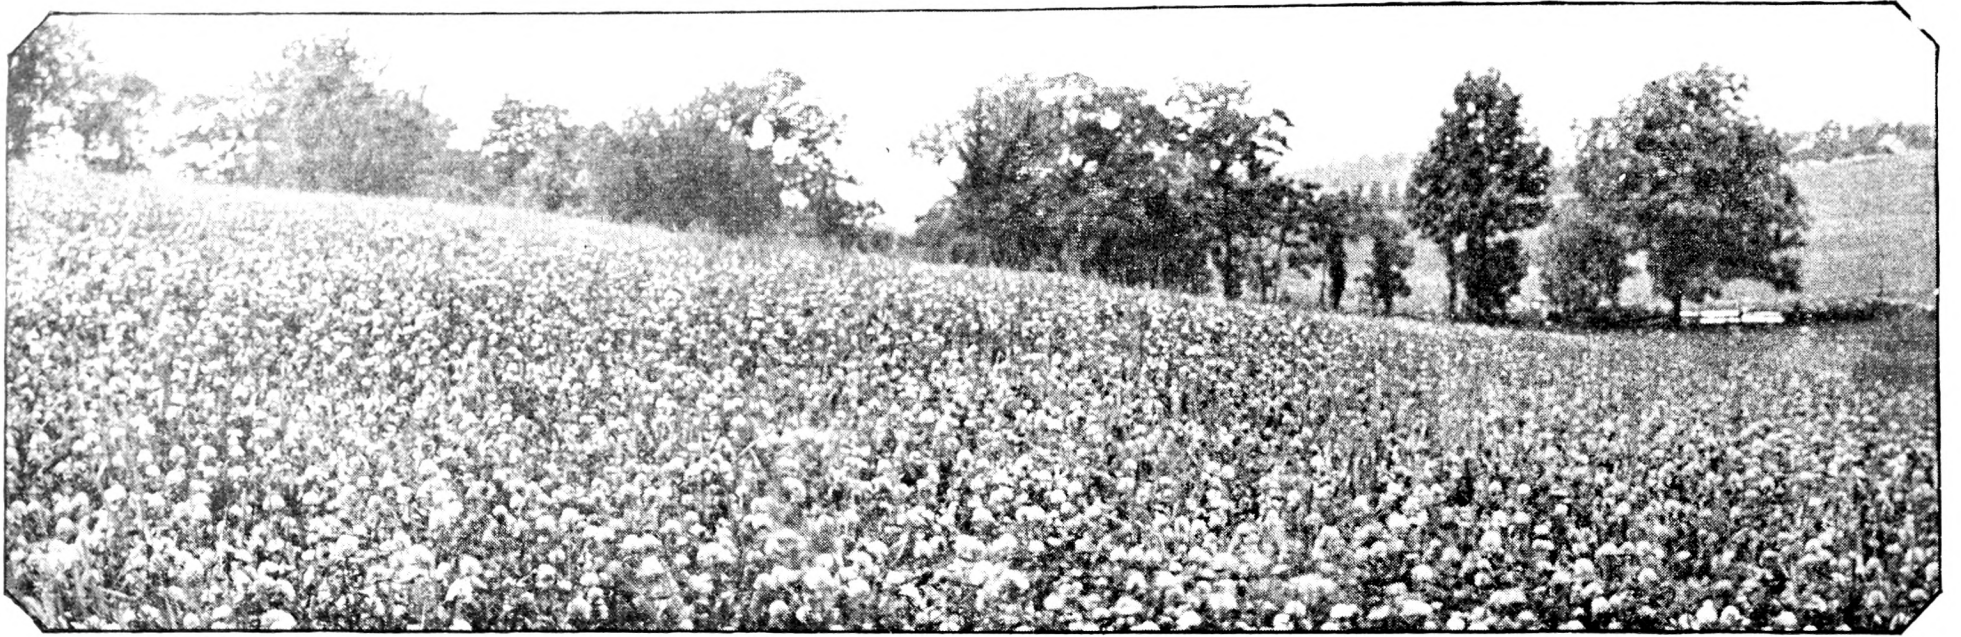

We hardly need to remind you that you will soon be needing farm seeds. Why not check your requirements now and send us your order?

We are sending you a new price-list quoting today's prices and will be glad to have your order as soon as possible so that we can reserve your seed. Your order can be shipped according to your directions, weather permitting, or if it is convenient you can come to Honeoye Falls when you need the seed.

To our old friends we again say, "Thank you for your patronage and your confidence in Dibble's Farm Seeds." Of course, we are eager to add new names to our list of old friends.

EDWARD F. DIBBLE SEEDGROWER

EDWARD F. DIBBLE SEEDGROWER • Honeoye Falls, N. Y.

OUR GUARANTEE

There is just one reason why we can afford to make the guarantee we do and allow you to be both judge and jury, and that is because our seeds are that kind. Dibble's famous "money-back-if-you-want-it" guarantee, subject to any test you want to make within ten days after the seeds reach you, is as fair and square as any ever given by an American firm. And our special guarantee or warranty is printed on the respective pages describing our seeds, and our various seeds are sold subject to the guarantee so printed. We are perfectly reliable and responsible. We refer you to the State Bank of Honeoye Falls, N. Y., Lincoln Alliance Bank and Trust Co., Rochester, N. Y., Dun & Bradstreet, Inc., Commercial Agency, or to any of our thousands of satisfied customers, some of whom must be in your vicinity.

Sincerely yours,
EDWARD F. DIBBLE SEEDGROWER

NORTHERN-GROWN DOMESTIC CLOVER

There will be a big demand for Clover, Alfalfa, and Grass seed this spring because the drought of 1939 in the Northeast killed a large percentage of new seedlings. Let us supply you with hardy northern-grown Clover and Alfalfa seed, the kind you need on your farm.

**MAIL
YOUR
ORDER
TODAY**

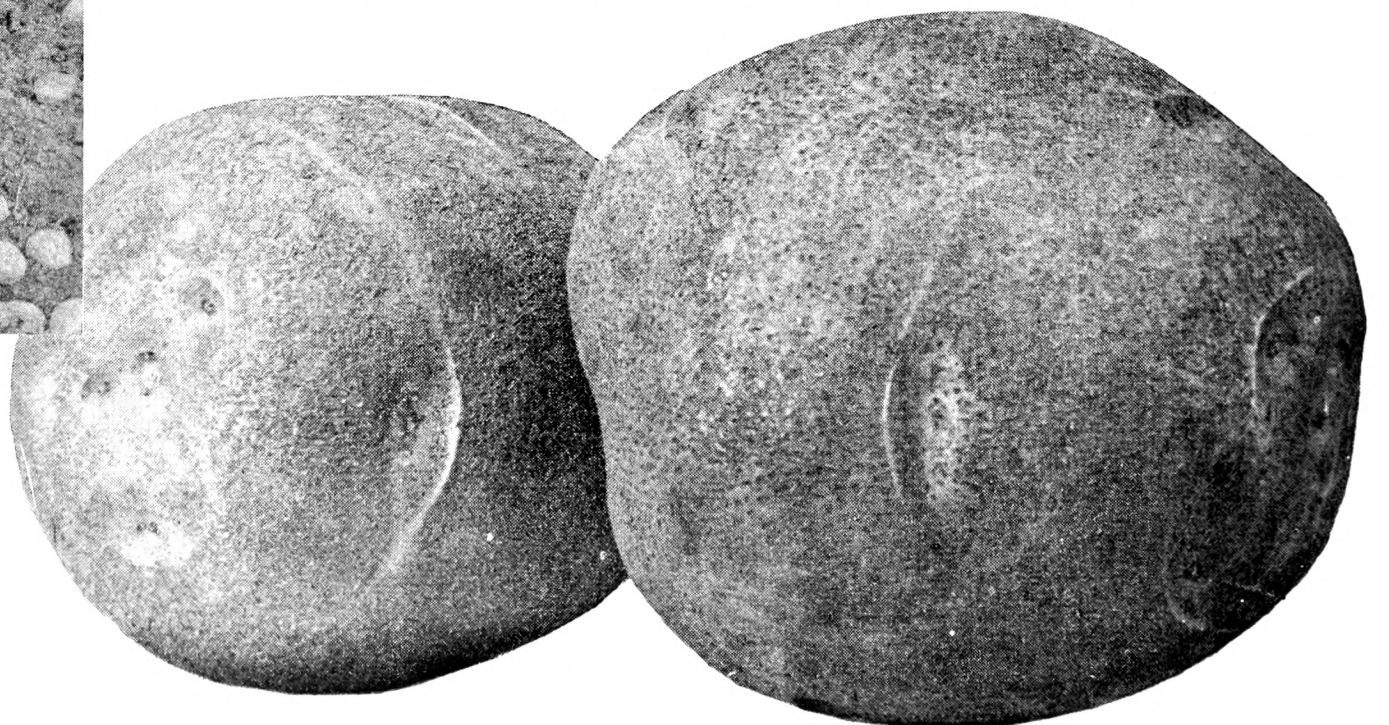

DIBBLE'S OATS

are productive and often give twice the yield of ordinary seed. Read the description in our Catalog and let us supply you with varieties that have proved their worth on hundreds of farms in the Northeast Territory. The tributes we have had from satisfied customers tell the story. See pages 8 and 9 of our 1940 Catalog.

DIBBLE'S SEED POTATOES

are grown by experienced seedgrowers, and in soils best adapted to each variety we offer. Rigid state and individual inspection insures a minimum of disease. We can say with honesty and with pride that we have good crops of all varieties and can furnish you with the best of seed.

RETURN POSTAGE GUARANTEED

The Latest on the Farm Seed Situation

Last year's spring seedings of grasses, clovers and alfalfas were lost or badly damaged by dry weather over a large area. This will cause an increased demand this spring for these seeds and also seeds for emergency hay crops such as Sudan, Millets and Soy Beans.

The supply of good hardy northern grown alfalfa is not too plentiful. We warn you against cheap seed from warm climates where the bulk of the alfalfa seed was produced.

While the supply of Red Clover and Sweet Clover appears to be ample, that of Alsike is short.

The Timothy crop now appears to be shorter than earlier expectations.

Markets are firm on the above seeds and in view of the increased demand could easily work to higher levels. We feel that present prices look attractive.

The crop reporting board at Washington estimated the merchantable potato stocks on hand January 1, 1940 available for sale in the 37 late and intermediate states at 103,318,000 bushels. This total is about the same as the revised estimate of a year ago and somewhat below average.

Southern plantings have been held back as a result of cold weather and northern potatoes will have a longer season to clean up before there can possibly be competition from the new crop. Considering this delay and damage to new crops in the south we should have good markets for the remainder of the season.

While the total 1939 crop of certified seed was the second largest on record, the crop of Russets and Smooth Rurals was short. The supply of these two important varieties is at least 25% short of a year ago and considerably below the average.
